

README_LPTmodelRepo

README Lagrangian Particle Tracking Model Repository

Created by J.Wong-Ala and L. Ciannelli

Date last edited: 10/27/2020

This repository contains:

- Modularized functions for the LPT model
- ROMS groundtruthing R scripts
- LPT model output analysis R scripts (post-processing, dispersal and retention, connectivity matrices)
- LPT model output

More detailed README.md files will be available for each folder based on the above four sections that will be created (soon).
